

Paperless patient forms

Eliminate tedious paperwork & reduce security risks for your dental practice

According to a study by Kelton Global, **51% of patients** prefer providers who let them fill out digital paperwork before visits. Enlive has joined NexHealth with digital, HIPAA-compliant forms to enable sending paperless documents to new and existing patients via web, text, and email, so it's easy to gather and record the most important patient details.

Benefits

No more scanning, shredding, filing or printing.

Save time for patients and staff by eliminating paper forms and other documents.

Eliminate manual data entry.

Automatically sync patient data to the right fields in your Practice Management System.

Reduce time in waiting rooms.

Go contactless by sending signable forms to patients via email and text messages.

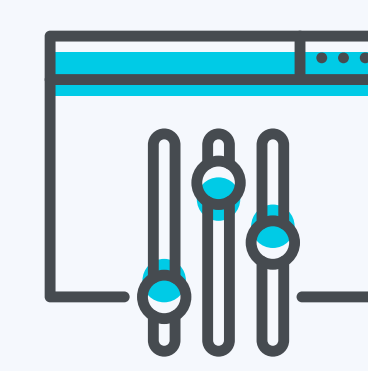

Ensure proper legal compliance.

Easily collect and store patient consent forms and treatment plans.

Securely manage patient information.

Have peace-of-mind with HIPAA-compliant forms with patient data encryption that is not viewable from other platform users.

Digitize any and all forms.

Migrate existing forms or easily build new ones for patients to complete medical history, consent, insurance verification, and more.
